Cyber Heroes

Live Action Security Awareness

Who we are

We are fun, diverse, professionals scattered across the world (but mostly based in South Africa).

We love educating and creating awareness of Cyber threats.

We are developers, marketers, project managers, information security professionals, techies, geeks, shoe addicts and outdoor enthusiasts.

What we do

We make complex security concepts simple to raise your employee's cyber awareness levels and protect your business against cyber threats and digital attacks.

Why we do it?

Criminals know it's easier to hack a human than trying to break through sophisticated security technology, making humans their most attractive targets.

People are so busy going about their daily tasks that they often do not stop to think before they click and they are more likely to fall for these threats, if they have not been trained in what to look out for.

How we do it?

Providing flexible learning mechanisms to address users overloaded work schedules is increasingly important.

Our story based learning material is short, entertaining and of high quality. Engaging user's emotions and making security personally relevant, we enable behaviour change.

Key messages are based on industry best practice and include elements of security frameworks such as ISO 27001, industry standards such as PCI DSS (Payment Card Industry Data Security Standard) and regulations such as Privacy laws (POPI, GDPR, PPI).

“ A picture is worth a thousand words
A good story is worth a thousand training sessions ”

Cyber Heroes

Live Action Security Awareness

Our light hearted Cyber Heroes series takes viewers on a journey with reformed cybercriminal Norm, who teaches users how to be cyber savvy. We see attack scenarios and how targets responses either turn them into cyber victims or cyber heroes.

Key Themes

- Phishing, spear phishing & vishing
- Mobile and removable devices (USB sticks etc)
- Password security
- Internet threats
- Mobile security (BYOD)
- Data leakage
- Social media security
- Cloud apps
- CEO scams
- Physical security
- New NIST password tips

Campaigns and Marketing

Campaign Management

Popcorn Training has over 6 year's experience in running successful security awareness campaigns at both large and small clients across various industries.

Marketing Material

As with any product or service, the level of uptake success lies in its marketing. That's why, with every training module, we offer a comprehensive marketing campaign to accompany your education awareness efforts, including posters, mailers, articles and web content designed according to your company's corporate identity requirements.
